BRAKE FLUID DOT IV [1500ML]

HELLO™ BRAKE FLUID DOT 4 is formulated from a mixture of high performance glycol & glycol ether for Disc & drum type brake systems, which call for DOT-3 & DOT-4 performance. It is specially designed for extremely low & high temperature. It greatly reduces the tendency to evaporate at high or elevated temperature when brake is in action. It provides very high boiling resistance and ensure an extra margin of safety over conventional brake fluids. It has a superb transfer of pressure in hydraulic braking system to ensure vehicle brakes effectively.

CARTON PACKING

- 24 X 1L

BENEFITS

- Miscible with all types of conventional brake fluids.
- Superb anti-corrosion properties to all types of metals.
- Ensures cleaner brake hose & piping system.
- Excellent frictional, oxidative and thermal stability.
- Protects at all seasons whether under hot or cold climates.
- Provides excellent lubricity & fluid stability.
- Enhances high viscosity control.
- Ensure slow viscosity control.

PERFORMANCE STANDARDS:

Brake and clutch fluid DOT 4 meets the requirement of the following specifications :
US FEDERAL MOTOR VEHICLE STANDARD FMVSS NO. 116 DOT 4 AND DOT 3

CERTIFICATE OF ANALYSIS (COA):

PARAMETERS	METHOD	UNIT	SPECIFICATION	RESULT
KINEMATIC VISCOSITY@100°C	ASTM D445	cSt	5.60 - 9.30	2.10
KINEMATIC VISCOSITY@40°C	ASTM D445	cSt	REPORT	80.70
SPECIFIC GRAVITY@15°C	ASTM D4052	kg/m³	1.00 - 1.20	1.13
APPEARANCE	VISUAL	-	REPORT	BRIGHT & CLEAR
COLOUR	ASTM D1500	-	0.5 - 3.0	2.0
