BRAKE FLUID DOT III [400ML & 750ML]

HELLO™ BRAKE FLUID III is a highly stable product and maintains its superior protective qualities over a long service and extreme conditions. It functions consistently, whether the vehicle is operating in bitter, arctic cold or extreme desert heat. In addition, this product exhibits good lubricity and anti-corrosion properties.

CARTON PACKING

- 24 X 1L

BENEFITS

- Miscible with all types of conventional brake fluids.
- Superb anti-corrosion properties to all types of metals.
- Ensures cleaner brake hose & piping system.
- Excellent frictional, oxidative and thermal stability.
- Protects at all seasons whether under hot or cold climates.
- Provides excellent lubricity & fluid stability.
- Enhances high viscosity control.
- Ensures low viscosity control.
- Compatible with all rubber components, whether rubber cups or seals.
- Prevents fluid from freezing.
- Do not mix with silicon based brake fluid.
- It is inert to rubber parts swellings.

PRODUCT PERFORMANCE CLAIM:

FMVSS NO. 116, SAE J1703,
DOT-3
