RADIATOR COOLANT [1 LITRE]

HELLO™ RADIATOR COOLANT (RED) is a mix of anti-freeze, anti-rust, corrosion inhibitor, anti-scaling, anti-cavitations & water. It is designed to protect your vehicle radiator and cooling system all year round. Most of all, It helps to avoid engine overheating. It has additives that are intended to protect your cooling system by preventing corrosion, rust,cavitations, scaling as well as providing lubrication and increasing cooling efficiency.

CARTON PACKING

- 24 X 1L

BENEFITS

- Ensures maximum protection from corrosion.and against rust.
- Protects radiator & engine from overheating.
- Protections against leaking & cavitations.
- Extremely inert to corrosion, pitting and overheating.
- Buffers the acidity of the engine coolant.
- Raises the boiling point of the engine coolant.
- Ideal for both air-conditioned and non- air-conditioned automobiles.
- Provides lubrications to the oil seals.
- Conditions oil seals.
- Extends the life of radiator & engine.

DIRECTIONS:

- 1) If radiator water is dirty/rusty, drain water from radiator, and flush with either radiator flush or clean water.
- 2) Pour content of radiator coolant as in the following instructions:
One can into radiator and one can in expansion (spare) container.

CERTIFICATE OF ANALYSIS (COA):

PARAMETERS	METHOD	UNIT	SPECIFICATION	RESULT
FREEZING POINT AFTER MIXING	ASTM D1120	°C	-74 - -78	-76
TOTAL GLYCOL WEIGHT, %	ASTM D202	-	REPORT	96%
SPECIFIC GRAVITY@15°C	ASTM D4052	kg/m ³	0.80 - 0.90	0.87
COLOUR	ASTM D1500	-	0.5 - 3.0	RED
